Introducing **SOLARWINDS**[®] **LOG & EVENT MANAGER** PUBLIC TRAINING CLASS

At Loop1, we specialize exclusively in offering the most comprehensive training and professional services for SolarWinds® clients around the world.

Virtual Appliance Deployment & LEM Manager

We will guide you through the installation process of the Virtual Appliance, LEM Console, and Report Console.

Working with Agents & Connectors

Understand the process of managing the LEM Agents and connectors nodes, including installation, configuration, and troubleshooting.

Integration: Linking LEM to Active Directory

Examining the process of connecting the LEM Agent to your active directory to track user and group authentication errors and failures, and more.

Monitor Real-Time Activity & Filters

The robust LEM Console includes many built-in filters. We will examine those as well as custom filters to monitor events.

Custom & Built-in Rules

Within the LEM Console, we will cover how to not only monitor but also setup responses to insecure and non-compliant user activity.

Using the LEM Reports Viewer

We will review the pre-configured reports, understand how to schedule, filter and run reports, and explore customized reporting.

Our singular focus on Solarwinds® technologies and our specialized training best prepares our client's staff to utilize their investment to their specific business needs and unique network challenges.
